### REMARKS/ARGUMENTS

The Office Action mailed June 11, 2007 has been received and its content carefully considered. Reconsideration and withdrawal of the outstanding rejections are respectfully requested in view of the foregoing amendments and the following remarks.

Claims 3-5, 7 and 13-19 are pending. The Applicant respectfully submits the Drawings are fully compliant with 37 C.F.R. §1.83 and that the use of conventional air bearing, leveling screws, and locking swivel wheels require no further elaboration to one skilled in the art.

### SPECIFICATION OBJECTION

The Examiner stated that many references to the features of particular claims throughout the specification are improper (e.g., see paras. [0012], [0014], and [0015]) because the specification should positively recite the features of the claims rather than inferentially

referring to subject matter of a particular claim through incorporation by reference thereto.  
Appropriate correction was made. Language from claim 1 was included in the specification,  
rather than reference to the claim. No new matter was added.

plates which is improper. Appropriate correction was made.

removed. Correction was made.

The Examiner stated that that the title of the invention is not descriptive. The title has  
been amended accordingly.
